

Balustrades

The company **Electrolux Inox S.A.** undertakes the construction of all type of inox balustrades. Our design department can draw according to its customer's desire all kind of balustrades based on the different trade sections. The costumer may select between several types of tubes, folding pieces, plates, even more meshes.

Our company can undertake the measuring, transportation and placement of the balustrades depending on the size of each project. We don't use finished accessories and standard products so the result of **Electrolux Inox** projects is unique.
